Description

Speech Banana is an app that helps individuals using a hearing aid or cochlear implant learn how to interpret and respond to everyday speech. It mimics the format of an in-person auditory training session, and focuses

iPad Screenshot

The speech banana team from John Hopkins will be speaking at the meeting. Their speech banana app for iPad helps CI cochlear implant recipients to better hear and is another way to add to the retraining process.

Isn't that exciting?!

6:30 to 8pm at HASA
